

IN THE SPECIFICATION

Please amend the paragraph within the specification beginning on page 1, line 8 with the following:

The invention finds its application in the industry of radio telephony networks of the cellular type utilizing notably CDMA modulation techniques.

Please amend the paragraph within the specification beginning on page 1, line 10 with the following:

A problem posed with this above type of system is within the synchronization of the receivers ~~of for different types of the stations~~. To find back the information, it is necessary one is to effect correlations with a word formed by chips which permits to find back the value of one bit. ~~On this~~ This subject may be consulted is discussed in United States Patent No. 5,550,811.

Please amend the paragraph within the specification beginning on page 1, line 14 with the following:

~~These synchronizations~~ Synchronization can become very difficult considering ~~that the hard if one considers~~ base stations (stations of the first type) connect to which a plurality of mobile stations (stations of the second type) ~~connect~~. The work of synchronization ~~at the level of for~~ the receivers of the base station becomes thus becomes excessive.
